

TO WHOM IT MAY CONCERN,

I am pleased to submit this application to be considered for the Town Council position for Grovebury ward. I am currently working as a Senior Executive Assistant to Country Director of Amazon Logistics UK and as Assistant Chief of Staff in the Blockchain and Climate Institute. The professional experience gained in these and previous roles has afforded me extensive experience in decision making on high value projects and statistical analysis for the use of monitoring strategy implementation. I also have extensive experience in rendering volunteer service both at home and abroad. I spent 2 years in Greece and Cyprus at the height of these country's financial crisis. I rendered food bank, English lessons and other community service. I learned Greek while I was there to connect better with the local community. At home I give frequent service on behalf of my local church organization, managing youth group activities and COVID-19 temporal needs of older community members. I am excited by the opportunity to use these attributes in my local community for their betterment.

- I lived in Grovebury ward for 2 and a half years having moved for work from Scotland, and have many close friends in the ward area. I have a vested interest as a result of seeing the best for the ward. I have a passion for public service in meeting the needs of the individual. My motivation for taking this role is that I want to give back to a community that has welcomed myself and my family so warmly. I am excited to be a part of the decision making process that affects the parish area, in maintaining public areas for public good, in working with local government and business and bringing an increase in community spirit through public events

I look forward to discussing this position with you further.

Yours Sincerely

Robert Yates
