Transport Matters: possible Bridge Street/Leighton Road timed crossing trial

Hi Mark

Unfortunately I don't believe it wouldn't carry any additional weight. As a highways dept we require and auditable trail.

For issues such as these that have been rumbling on I believe TMM would be the best approach to get a formal response from Highways.

Schemes in progress that are already part of the capital programme of works and require reporting on (due to the statutory consultation element, funding source etc) go to TMM.

Items where there is wider interest and this is shown by a valid petition will also feature. The petition contents is checked and verified by Craig before it is then sent to us to address.

The Town Council can create the petition and I think only 15 hand signatures are required. Electronic are around 100, but Craig will need to confirm this as this process is managed by his dept.
